Self Pump Out Kit: for discharging to Sanitary Stations, Quayside Sewage Tanks or direct to Foul Sewer.

This Heavy Duty hand operated kit allow owners to use it's excellent capacity of 135 litres per minute to pump out their own boats or holding tank quickly and easily. Also very useful where no commercial facilities are available.

Pump-out kits are supplied with all necessary fittings and the foot held pump mounting doubles as stowage for the hoses. The kits incorporates 2 metres of suction hose and 10 metres of lay-flat discharge hose. The latter, when coiled, is only 229 mm (9) diameter by 63mm (2½). Additional lengths of lay-flat hose and connectors are available.

The four handwheels provide easy access to the pumping chamber without the need for tools. The pump body is made from epoxy powder coated aluminium and all fastenings and handle are stainless steel. Nitrile diaphragms are fitted as standard.

The hose to deck connection is a push-in sight glass connector, to fit the international standard deck fitting.

Alternatively, a push-in probe connector is available if preferred.

Service Kit Part No: 03356
