

Light duty Self Pump Out Kit

Part No: 01019

For discharging to Sanitary Stations, Quayside Sewage Tanks or direct to Foul Sewer.

Hand operated kits allow owners to economically pump out their own boats holding tank quickly and easily. Also very useful where no commercial facilities are available.

Pump-out units are supplied with all fittings necessary and the foot held pump mounting arrangement doubles as stowage! mounting for the hoses etc. The sets incorporate 2 metres of suction hose and 10 metres of lay-flat discharge hose. The latter, when coiled, is only 229 mm (9) diameter by 63mm (2½). Additional lengths of lay-flat hose and connectors are available.

The hose to deck connection is a push-in sight glass connector, to fit the international standard deck fitting.

Alternatively, a push-in probe connector is available if preferred.

Technical Specifications

Dimensions

Height	610mm
Width	560mm
Depth	250mm

Performance

Inlet	38mm
Outlet	38mm

Max Horizontal Pipe

run at no Head	35m
Dry Prime Lift	1.75m
Total Head	5m
Flow Rate	10 GPM

Weight	10Kg
