

- Peristaltic pump
- Manufactured in Marine Grade aluminium (AS605)
- Self Priming & can run dry
- Pump capable of handling abrasive, shear-sensitive products with long fibre and solids.
- Seven pump sizes, different port options and hose material types, allow for individual adaptation to application.
- Choice of frames and motors.
- Very good suction properties - up to 9.5m lift.
- Constant pump capacity during entire hose life.
- Still highly efficient when handling very viscous media

Pump LS30T

Part No. LS30T

Dimensions:

Height H = 430mm
Length L = 610mm
Width W = 420mm

Data:

Capacity: 300 l/min
Motor power: 3.6 kW
Weight: 65 kg
Max suction height max: 9.5m
Max discharge length: 160 m
Max pressure height: 15 m
Connection: 2" BSP
