

On-board Transfer Tank and Pump

Part No: **LEESANTRANS**

LeeSan Transfer System

This transfer system allows the discharge of waste from boats and other structures to be delivered to a sewer system or larger on shore holding tank. These systems are used extensively on marinas, piers and other remote waterside locations. The unit can also be installed on board larger boats, houseboats and welfare facility buildings

Features:

- Reliable automatic discharge pump, Free passage of solids up to 45mm
- Can be installed where most convenient, Due to use of single phase supply
- Plug & Play, Simple hose connections for input to tank
- Powerful pumping unit Hmax 12m, Qmax 26.5m³/h
- Superior design Swing check valve included
- Long operating life, Pump manufactured using quality materials. Quality bespoke made tank.
- MicroVent activated carbon filter to eliminate all odours from the system.

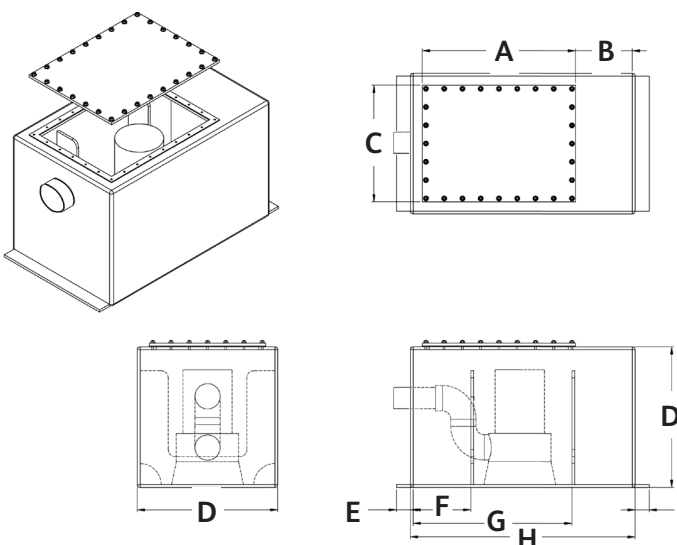

Optional:

- Separate control and monitoring panel to include motor overload protection, An alarm will notify the owner of problems should they occur.
