

## Gobius 4 Tank Level Indicator

**Part No:**

**Waste** 970442

**Fuel & Water** 970497

### Gobius 4 for all tanks

Measuring from the outside of the tank using the 'knock & listen' method, the Gobius 4 is extremely easy to install. It takes no more than 30 minutes and avoids the need to take the tank apart or drill unnecessary holes, making it an ideal product for retro fitting to tanks already in service.

Suitable for tanks containing waste, water or Diesel

Tank Wall Thickness

Mild steel (1-3mm),

Stainless steel (1-3mm),

Aluminum (2-5mm)

Plastic (2-10mm) or GRP (4-8mm) no matter what size or shape of tank.

### Installed and ready to use in 30 minutes!

Avoids direct contact with the contents

Can be retro-fitted to tanks of any shape or size of a tank

Calibrates automatically

Can be installed without extra service or cleaning of inside of the tank

Can be connected to displays from Wema, VDO, Teleflex, Faria, Phillippi and other analogue instruments

Supports 10-180 Ohm, 240 - 33 Ohm and 4 20 mA

Supports NMEA 2000 with an analogue adapter

Extremely low electricity consumption, less than 40 mA (supports 12 -24 Volts)
