Hand Pump Y3

Part No:
Y3

Dimensions

A	B	C	D	E	F	
365	211	250	132	38	19	mm
G	H	I	J	K		
184	225	370	450	55		mm

TECHNICAL SPECIFICATIONS:

Water Connection Inlet ¾" BSP
Waste Outlet 1½" (38mm)

Weight 12Kg

With the Y3 marine toilet we are starting a new generation of manual toilets. The combination of high-quality materials, a hard-wearing technology and minimum weight take the customers' requests into account to introduce a compact and light, but reliable toilet into the market.

With the Y3 Rheinstrom applies high standards to manual toilets. The pump stands out due to the use of an aluminium cylinder tube with pump piston made of Delrin and a piston gasket made of PTFE, which ensures an almost wear-free operation.

There has never been a better way to solve problems arising during the use of manual toilets. The mechanical guide of the Rheinstrom pump piston lever makes sure that pumping is effortless and prevents tilting of the piston inside the cylinder. Due to its compact dimensions standard toilets can easily be exchanged - almost everywhere - for the the Rheinstrom Y3.

Fastening systems do not have to be changed. The Y3 marine toilet is suitable for all sports boats and charter boats. It is very suitable for sailing boats because of its light weight and its small dimensions.

Small dimensions
Light weight Few wear parts

Exchangeable without alteration of fastening system Sea-water resistant

Long duration tests have shown the high reliability of the new marine toilet Y3. The marine toilet Y3 is naturally suitable for long-term operation.
