

DTM Series Tank Monitor Systems

Sealand[®]
by Dometic GROUP

Accurate, continuous tracking of tank capacities is enjoyed by boatowners with our complete series of DTM tankmonitors. Each DTM panel provides easy-to-read, distinctive LED illumination that indicate up to four levels of tank contents.

Level probes install into rigid tanks are adjustable to desired level indication heights. The DTM04 can be connect with DTD tank discharge control to offer convenient holding tank discharge options.

DTM01

Single-level tank monitor system indicates when waste holding tank is full. Probe assembly installs on virtually any rigid tank material.

Part No (DTM01)

01737
