

Self Pump Out Kit Operation Guidelines

Light Duty Self P/O Kit
Part No: 01019

Electric Self P/O Kit
Part No: (12v) 02770
(24v) 02771

Heavy Duty Self P/O Kit
Part No: 08434

For the purpose of these operation guidelines, we will use the light duty self pump out kit, the principles of use are the same for all three units

Unpack Your Self Pump Out Kit

Lay the hose out to the
Elsan disposal
point and make the
connection to the pump

Rinse the pump and
pipework with Raw
water to check the
connection and pump

Open the Deck fitting on
the boat and
connect the suction pipe

Start operating the pump

Once you notice a change in the sight glass, add some rinse water to the tank and pump the tank empty again

Having emptied the tank, disconnect the pipe from the deck fitting and rinse the unit through with pumping raw water

Pack the unit neatly away and return the kit to the locker until you need it again
